Structural Interpretation of

...

Aeromagnetic surveys are a widely recognized exploration technique in mineral exploration especially in covered terranes. They are often not

Access Free Aeromagnetic Structural Interpretation

used to their full
potential, with direct
anomaly targeting and
lineament analyses conducted
but little else. The real
value in aeromagnetic data
can be unlocked by
integrating multiple data

Access Free Aeromagnetic Structural Interpretation

sets into the interpretation of the data with the aim to produce a coherent geological map which outlines the structural and geological history.
