Following the success of its best-selling predecessors, the Fourth Edition of Harriette Pipes McAdoo's Black Families retains several now classic contributions while including updated versions of earlier chapters and many entirely new chapters. The goal through each revision of this core text has been to compile a book that focuses on positive dimensions of African American families. The book remains the most complete assessment of black families available in both depth and breadth of coverage. Cross-disciplinary in nature, the book boasts contributions from such fields as family studies, anthropology, education, psychology, social work, and public policy.

"Bravo to the authors! They have done an excellent job addressing the issues that are critical to community members, policy makers and interventionists concerned with Black families in the context of our nation." —Michael C. Lambert, University of Missouri, Columbia "African American Families is a timely work. The strength of this text lies in the depth of coverage, clarity, and the ability to combine secondary sources, statistics and qualitative data to reveal the plight of African Americans in society." —Edward Opoku-Dapaah, Winston-Salem State University "African American Families is both engaging and challenging and is perhaps one of the most important works I have read in many years. This book will most certainly move the discourse of the socio-economic conditions of black families forward, beyond the boundaries already set by other books in the market. African American Families is an excellent book whose time has come, and one that I would most definitely adopt." —Lateef O. Badru, University of Louisville African American Families provides a systematic sociological study of contemporary life for families of African descent living in the United States. Analyzing both quantitative and qualitative data, authors Angela J. Hattery and Earl Smith identify the structural barriers that African Americans face in their attempts to raise their children and create loving, healthy, and raise the children of the next generation. Key Features: Uses the lens provided by the race, class, and gender paradigm: Examples illustrate the ways in which multiple systems of oppression interact with patterns of self-defeating behavior to create barriers that deny many African Americans access to the American dream. Addresses issues not fully or adequately addressed in previous books on Black families: These issues include personal responsibility and disproportionately high rates of incarceration, family violence, and chronic illnesses like HIV/AIDS. Brings statistical data to life: The authors weave personal stories based on interviews they've conducted into the usual data from scholarly(?) literature and from U.S. Census Bureau reports. Provides several illustrations from Hurricane Katrina: A contemporary analysis of a recent disaster demonstrates many of the issues presented in the book such as housing segregation and predatory lending practices. Offers extensive data tables in the appendices: Assembled in easy-to-read tables, students are given access to the latest national agencies data from agencies including the U.S. Census Bureau, Centers for Disease Control, and Bureau of Justice Statistics. Intended Audience: This is an ideal textbook for advanced undergraduate and graduate courses such as African American Families, Sociology of the Family, Contemporary Families, and Race and Ethnicity in the departments of Human Development and Family Studies, Sociology, African American Studies, and Black Studies.

The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and

scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilksburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilksburg, Perry also spotlights five others where he has deep connections: Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities. Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. Know Your Price demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal book, are what we need to know and understand to build Black prosperity.

"Black people are not dark-skinned white people," says advertising visionary Tom Burrell. In fact, they are a lot more. They are survivors of the Middle Passage and centuries of humiliation and deprivation, who have excelled against the odds, constantly making a way out of "no way!" At this point in history, the idea of black inferiority should have had a "Going-Out-of-Business Sale." After all, Barack Obama has reached the Promised Land. Yet, as *Brainwashed: Challenging the Myth of Black Inferiority* testifies, too much of black America is still wandering in the wilderness. In this powerful examination of "the greatest propaganda campaign of all time" - the masterful marketing of black inferiority - Burrell poses 10 provocative questions that will make black people look in the mirror and ask why, nearly 150 years after the Emancipation Proclamation, so many blacks still think like slaves. *Brainwashed* is not a reprimand; it is a call to deprogram ourselves of self-defeating attitudes and actions. Racism is not the issue; how we respond to racism is the issue. We must undo negative brainwashing and claim a new state of race-based self-esteem and self-actualization.

Common stereotypes portray black fathers as being largely absent from their families. Yet while black fathers are less likely than white and Hispanic fathers to marry their child's mother, many continue to parent through cohabitation and visitation, providing caretaking, financial, and other in-kind support. This volume captures the meaning and practice of black fatherhood in its many manifestations, exploring two-parent families, cohabitation, single custodial fathering, stepfathering, noncustodial visitation, and parenting by extended family members and friends. Contributors examine ways that black men perceive and decipher their parenting responsibilities, paying careful attention to psychosocial, economic, and political factors that affect the ability to parent. Chapters compare the diversity of African American fatherhood with negative portrayals in politics, academia, and literature and, through qualitative analysis and original profiles, illustrate the struggle and intent of many black fathers to be responsible caregivers. This collection also includes interviews with daughters of absent fathers and concludes with the effects of certain policy decisions on responsible parenting.

For decades the black community has been perceived, both in the United States and around the world, as one which thinks alike, acts alike and lives alike - in poor and downtrodden environments. Following the persistent effects of the great recession and the American elections of 2008, now more than ever the political and socio-economic state of America is crying out for this deficient and prejudiced conception to be dispelled. Focusing primarily on black families in America, *Contemporary African American Families* updates empirical research by addressing various aspects including family formation, schooling, health and parenting. Exploring a wide class spectrum among African American families, this text also modernizes and subverts much of the research resulting from Moynihan's 1965 report, which arguably misunderstood the lived experiences of black people during the movement from slavery to freedom in a Jim Crow society. A timely subversion of the myth that America is successfully in a post-racial era, this new anthology on the Black Family in America will appeal to advanced undergraduate students and research scholars interested in black studies, Africana studies, women and gender studies, sociology, political science, anthropology, criminal justice, education, psychology, public policy, healthy policy and social work.

What if everything you thought you knew about Black people generally, and educating Black children specifically, was based on BS (bad stats)? No BS uses robust analysis, meaningful anecdotes, and powerful commentary to dispel myths and challenge conventional beliefs about educating Black children.

Here's another myth that has survived the tests of time. It has been passed on from one generation to the next, thereby preserving the lessons it brings. If you would notice, most of the Greek and Roman myths deal with curses and powers, which would pretty much describe the beliefs of the people who first told them.
