An illustrated overview of the architects, designers and planners who have influenced Evanston's design history.

For more than a century, Chicago's skyline has included some of the world's most distinctive and inspiring buildings. This history of the Windy City's skyscrapers begins in the key period of reconstruction after the Great Fire of 1871 and concludes in 1934 with the onset of the Great Depression, which brought architectural progress to a standstill. During this time, such iconic landmarks as the Chicago Tribune Tower, the Wrigley Building, the Marshall Field and Company Building, the Chicago Stock Exchange, the Palmolive Building, the Masonic Temple, the City Opera, Merchandise Mart, and many others rose to impressive new heights, thanks to innovations in building methods and materials. Solid, earthbound edifices of iron, brick, and stone made way for towers of steel and plate glass, imparting a striking new look to Chicago's growing urban landscape. Thomas Leslie reveals the daily struggles, technical breakthroughs, and negotiations that produced these magnificent buildings. He also considers how the city's infamous political climate contributed to its architecture, as building and zoning codes were often disputed by shifting networks of rivals, labor unions, professional organizations, and municipal bodies. Featuring more than a hundred photographs and illustrations of the city's physically impressive and beautifully diverse architecture, *Chicago Skyscrapers, 1871 – 1934* highlights an exceptionally dynamic, energetic period of architectural progress in Chicago.

“ A handy guidebook that profiles a building per page, with a drawing and vital statistics on most of Chicago ’ s major historic and modern buildings. ” —Chicago Tribune Updated and expanded to chart the changing urban landscape of Chicago--as well as to incorporate a section on Chicago ’ s campus architecture, including works by Rem Koolhaas at the Illinois Institute of Technology and Frank Lloyd Wright at the University of Chicago--the second edition of this popular handbook is a perfect companion for walking tours and an excellent source of background information for exploring the internationally acclaimed architecture of Chicago. Over 100 highlights of downtown Chicago are covered, from Michigan Avenue to the riverfront to the Loop, with accompanying maps, a glossary of architectural terms, and an index of architects and buildings.

I. W. Colburn: *Emotion in Modern Architecture* chronicles the career of one of Chicago ’ s most influential mid-century modernists. Colburn ’ s houses, institutional buildings, and religious structures feature a highly refined blend of structural expression and deeply embedded elements of traditional architecture. Colburn was an independent architect whose sculptural buildings were controversial in his time, but whose mastery of proportion, materials, and space have gained wide recognition 50 years later. Colburn ’ s architecture was extremely influential to architects in the mid-twentieth century who were also struggling with modernism ’ s relationship to the architecture of the past—to the "golden mean" and other classical principles of balance and repose. Colburn believed that architecture should express "grace, glory and aspirations." His design sense, joined with a brilliant rapport with clients, enabled an architecture that included

modernist clarity and undeniable luxury. This book traces Colburn ' s life, from his childhood in Boston and education at Yale to a career that reached its heights in Chicago. He later returned to New England where he restored Early American houses and Gilded Age mansions. The arc of Colburn ' s career touches many influences without ever losing its exceptionally modern, and innovatively modernist, identity. I. W. Colburn: Emotion in Modern Architecture is the story of an exceptional architect and of more than 100 design projects, some of which seemed outlandish when built, but many of which appear timeless today.
