We installed a split type unit (12000 btu). Please note that this instructable is not a detailed step by step guide but rather an overview of how the job was done. The first step is to position the blower/evaporator unit. Mount the bracket and then find a location for the compressor unit outside.

~~Installation of a Split Type Air Conditioning Unit. : 4 ...~~

A split air conditioner consists of an outdoor unit and an indoor unit. The outdoor unit is installed on or near the exterior wall of the room that you wish to cool. This unit houses the compressor, condenser coil and the expansion coil or capillary tubing. The sleek-looking indoor unit contains the cooling coil, a long blower and an

air filter.

~~What is a Split Air Conditioner System? | Networx~~

A split air conditioner is composed of two separate units, a condensing unit and an evaporative coil (known as a “condenser,” and a “coil” respectively in short-hand or slang). It is from these two separate units that a split air conditioner gets its name. These units are joined by a set of copper tubing known as a “line-set,” which transfers refrigerant from one unit to another.

~~Amazon Best Sellers: Best Split System Air Conditioners~~

Traditional central air conditioning is not always the best fit for every home. If you have an older home, installing whole-home air conditioning may not be possible due to lack of space for ductwork. Fortunately, there's a popular, flexible solution: ductless heating and cooling units, known as ductless mini split air conditioners.

~~Ductless Mini Splits — The Home Depot~~

The system is 'split' into an air outlet unit inside and a compressor box outside. Hot air is sucked out of a room and replaced with cold, conditioned air via a pipe containing refrigerant gas connecting both parts. The most popular type of Australian AC, split system models are efficient, affordable and quiet.
