Review Methods Apply To
Service

6.1 Architecture Evaluation
Methods. Software
architecture evaluation is
the analysis of a system's
capability to satisfy the
most important stakeholder
concerns, based on its large-
scale design, or
architecture (Clements et
al., 2002). On the one hand,
the analysis discovers
potential risks and areas
for improvement; on the

Software architecture -
Wikipedia

Partly motivated by this
reasoning, a new software
architecture evaluation
method called DCAR was
proposed in [21]. DCAR uses
architectural decisions as
the basic concept in the
architecture evaluation.
Another central concept in
DCAR is a decision
force—that is, any fact or

Software Architecture &
Design Introduction -
Tutorialspoint
Software architecture
evaluation methods can be
divided into four main
categories, i.e., experience-
based, simulation-based,
mathematical modeling based.
Methods in the categories
can be used independently
but also be combined to
evaluate different aspects
of software architecture, if
needed.
