When Sir John Hale suffered a stroke that left him unable to walk, write or speak, his wife, Shelia, followed every available medical trail seeking knowledge of his condition and how he might be restored to health. This book is a unique exploration of aphasia - losing the ability to use or comprehend words - as well as of the resilience of love.

In a time when the Industrial Revolution has become an all-out war, mad science rules the world—with mixed success. In Agatha H and the Siege of Mechanicsburg, Agatha Heterodyne, the last of the Heterodyne family, has returned to her family ' s hereditary town with the might of the Wulfenbach Empire hot on her heels. The only thing holding off an outright attack is Gilgamesh Wulfenbach, the heir to the Empire, who has joined Agatha and her friends inside the great artificially intelligent fortress of Castle Heterodyne. Now they must race to repair the mechanisms that once allowed the Castle to defend Mechanicsburg, before the rest of Europa shows up to take all the revenge the mad Heterodynes of the past so richly earned. From the Hugo Award – winning Girl Genius online comics comes this fourth book in the Agatha H. series, and like the previous three books, it will engage you in a unique world of adventure, romance, and mad science!

... this Handbook is inspiring. It is designed to assist educators in developing new programmes and pedagogical approaches based upon the previous experiences of others who have forged this exciting new path. I recommend it highly for the inspired as well as for the disillusioned entrepreneurship educator. Howard H. Frederick, Journal of Educational Administration and History This Handbook explores the current state of university-wide entrepreneurship education programs and provides a comprehensive reference guide for the planning and implementation of an entrepreneurship curriculum beyond the business school environment. A variety of authors spanning five countries and multiple disciplines discuss the opportunities and universal challenges in extending entrepreneurship education to the sciences, performing arts, social sciences, humanities, and liberal arts environments. The Handbook is designed to assist educators in developing new programs and pedagogical approaches based upon the previous experiences of others who have forged this exciting new path. Sections of the Handbook are devoted to philosophies and theory that provide a legitimate intellectual foundation for the fusion of entrepreneurship education with other traditional disciplines of the university, the politics and process of implementing entrepreneurship initiatives outside business schools, and examples of approaches to implementing entrepreneurship education outside business schools. The book identifies expected problems and solutions for new entrepreneurship curriculum development. It offers theory on education pedagogy that is critical to addressing concerns of non-business educators, and provides examples of successful efforts in a variety of non-business departments. Entrepreneurship faculty across disciplines and graduate students seeking ways to broaden involvement in entrepreneurship curriculum will find this volume invaluable, as will school administrators both in business and in the arts and sciences.

This engagingly written, jargon-free challenge to the misguided and dangerous global obsession with cultural difference critiques the popular notion that world affairs are determined by civilizations with immutable and conflicting cultures. Culture is too often understood as a straightjacket of values that make people act in a certain way. A more accurate and constructive approach is to see culture as a changing system of meaning, which individuals deploy selectively to make sense of the world.

The failures of " free-market " capitalism are perhaps nowhere more evident than in the production and distribution of food. Although modern human societies have attained unprecedented levels of wealth, a significant amount of the world ' s population continues to suffer from hunger or food insecurity on a daily basis. In Agriculture and Food in Crisis, Fred Magdoff and Brian Tokar have assembled an exceptional collection of scholars from around the world to explore this frightening long-term trend in food production. While approaching the issue from many angles, the contributors to this volume share a focus on investigating how agricultural production is shaped by a system that is oriented around the creation of profit above all else, with food as nothing but an afterthought. As the authors make clear, it is technically possible to feed to world ' s people, but it is not possible to do so as long as capitalism exists. Toward that end, they examine what can be, and is being, done to create a human-centered and ecologically sound system of food production, from sustainable agriculture and organic farming on a large scale to movements for radical land reform and national food sovereignty. This book will serve as an indispensable guide to the years ahead, in which world politics will no doubt come to be increasingly understood as food politics.

Pocket Posh Á © King James Puzzles: The Life of Jesuspairs faith and fun in a wonderfully attractive package. This book of amazing brainteasers explores and teaches Biblical verse in a pretty little package.
