Read Free Liferay 6 2 Interface Development Ebook

Liferay's developers use a tool called Service Builder to build services. When you build services with Service Builder, all remote-enabled services (i.e., service.xml entities with the property remote-service="true") are exposed as JSON web services. When each *Service.java interface is created for a remote-enabled service, the @JSONWebService annotation is added on the class level of that ...
