The System 50 is a pure rate autopilot, which uses an inclined rate gyro in the Turn Coordinator instrument as the primary roll and turn rate sensor and an accelerometer and an absolute pressure transducer as pitch rate sensors. The turn coordinator includes an autopilot pick-off, a gyro RPM detector and an instrument power monitor.

Avionics Installation | New United Goderich Inc.

Proposals for new autopilot upgrades can be shocking. Even entry-level wing-leveling systems start at \$10,000, not including installation. But that won't buy much. Higher-end models with add-on options can easily snowball a project to \$40,000. That's roughly the cost of an average engine replacement or an average Skyhawk.
