USS Constitution - Wikipedia

The Constitution was one of the first frigates built by the fledgling U.S. Navy, ordered in 1794 as a counter to the Barbary corsairs in the Mediterranean. Heavily built but fast, she was rated as a 44-gun ship but mounted thirty 24-pounder cannons. Her most famous encounter came in 1812 when she successfully fought against the HMS Guerriere, earning the nickname "Old Ironsides" when the British round shot could not penetrate her walls. Built in Boston where she has been berthed for over seventy years, she is considered to be the oldest commissioned warship afloat in the world. The internationally-acclaimed draftsman and author Karl-Heinz Marquardt worked closely with the team at the Constitution to ensure that the book is accurate and up-to-date. Dozens of photographs and some 100 perspective and 3-view drawings are included along with fully descriptive keys and a large-scale foldout plan on the reverse side of the jacket.

This is a new release of the original 1928 edition.

The story of America's oldest commissioned ship, the frigate, the U.S.S. Constitution, known as "Old Ironsides," is retold from its maiden voyage in 1798 to its prominent activities in the U.S. bicentennial celebration to the ship's own 1997 bicentennial, discussing the ship's construction, its restoration, its military service, and more. Reprint.

The rigging of period ship models is the most complex task which any modeller has to take on, for an eighteenth-century man-of-war boasted mile on mile of rigging, more than 1,000 blocks, and acres of canvas. To reduce this in scale, and yet retain an accurate representation, is an awesome undertaking. This now classic work untangles the complex web, and, using some 400 drawings, the author shows clearly how each separate item of rigging is fitted to the masts, yards and sails. Each drawing deals with only one particular item so that it can be seen clearly in isolation. The lead of a particular halliard, the arrangement of a bracing line, these and every other detail is depicted with startling clarity. Based on the author's research of numerous eighteenth-century models, each one with its contemporary rigging still extant, the information is both meticulous and accurate. The remarkable visual immediacy and clarity of this work makes it truly unique and no modeller of period ships can afford to be without it at his side. In addition, the book is a (must-have) practical reference work for all those involved in the rigging and repair of historic ships.

A modern, objective appraisal of the development of seamanship among the major navies of the world from the 17th to the 19th century.

This work is a training manual for members of the crew of the 1797 United States frigate Constitution, the world's oldest warship in commission. The venerable vessel, which earned its nickname, "Old Ironsides," during the War of 1812, is today permanently berthed in the Charlestown Navy Yard, across the Charles River from its building site in Boston, Massachusetts. The historic frigate is open to visitors year round, with tours provided by the crew, active sailors in the United States Navy. The lessons in the manual are divided among three groups, corresponding to the three skill levels of the tour guides, Basic, Advanced, and Master. In addition to the chronology and major events in the history of USS Constitution, the manual explains the historical contexts in which those events took place. The text is written in an engaging and accessible manner that will make it attractive to anyone interested in USS Constitution or in the early U.S. Navy in general.

The United States and Europe. Whether you're a beginner or an expert, and whether you have hours to spend on a project or years, you'll find money- and time-saving ideas on every page. Book jacket.

Launched in 1797, USS Constitution is a wooden-hulled, three-masted heavy frigate of the United States Navy. She is renowned for her actions during the War of 1812 against the Britain, when she captured numerous merchant ships and defeated five British warships. The battle with HMS Guerriere earned her the nickname 'Old Ironsides' and a longstanding public adoration that has repeatedly saved her from scrapping. She continued to serve as flagship in the Mediterranean and African squadrons, and circled the world in the 1840s. Retired from active service in 1881, Constitution served as a receiving ship until designated a museum ship in 1907. Comprising a series of documents and illustrations that give information on the building of the ship, her wartime service history and life on board ship during the years of her service, this fascinating book tells the story of Old Ironsides
